DETAILED ACTION

Receipt is acknowledged of the Amendment filed August 11, 2004.

Terminal Disclaimer

The terminal disclaimer filed on August 11, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US PAT No. 6,653,862 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-6, 8-17 and 19-22 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Although, McClintock et al. (US PAT No. 5,900,743) teaches a programmable logic array devices with interconnect lines of various lengths, one of ordinary skill in the art would not have been motivated to modify the teaching of McClintock to further include, among other things, the specifics of signal routing lines where drivers along that signal routing line are spaced along that signal routing line and that signal line is substantially interrupted by an interface region such that a partial signal routing line is formed for that signal routing line between the interface region and a driver along that signal routing line from the interface region and an input driver configured to drive from the interface region along the partial signal routing line formed for that signal routing line, etc., as set forth in the claims.

Art Unit: 2819

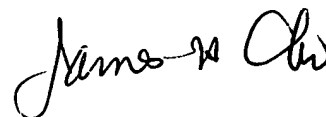

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
